

DISCOVERY NETWORKS INTERNATIONAL'S HIT SERIES 'MAROONED' WITH ED STAFFORD TO RETURN FOR SECOND INSTALLMENT

(London, UK – November 16, 2015) – Discovery Networks International today announced that Ed Stafford's epic **MAROONED** will return for a second season.

Produced by UK indie Tigress Productions, 6x60' **MAROONED** season 2 will feature renowned adventurer and survivalist Ed Stafford, whose previous credits include the Discovery Channel series **ED STAFFORD: INTO THE UNKNOWN, WALKING THE AMAZON** and **NAKED AND MAROONED**.

MAROONED season 2, a 6x60' series, will premiere on Discovery Channel across more than 220 countries and territories in 1Q 2015.

In season 2, Ed returns for six more challenges in some of the harshest environments known to mankind. In each episode Ed maroons himself in a remote location that could put his life in jeopardy within hours, unless he devises a strategy to survive.

MAROONED season 2 is entirely self-shot by Ed in extreme, remote locations ranging from the arid and rocky Gobi Desert in Mongolia to the tropical jungles of Guatemala and the Namibian high veld. The series follows Ed as he strives not just to stay alive, but to thrive, armed with nothing but an emergency phone, medical kit and his camera to record his adventures.

"This new season captures Ed doing what he does best – pushing his survival skills to the limits in his true inimitable style," said Helen Hawken, Vice President Production & Development, Discovery Networks International. "Despite crossing the Amazon and spending 60 days alone on a deserted island, Ed still manages to prove that he can survive and even thrive in even more inhospitable terrains than ever before."

MAROONED is produced for Discovery Networks International by Tigress Productions. For Discovery Networks International, Helen Hawken is commissioning editor and Tom Gorham is executive producer. For Tigress Productions, Dick Colthurst is executive producer and Tim Walker is series producer.

Marjorie Kaplan is the president of content for Discovery Networks International.
